

LEARN PERMACULTURE

THIS AUGUST, WITH DARREN DOHERTY

“THE INTEGRATIVE PRACTICE OF LIVING WITH THE LAND”

- *Over 34,000 acres are deforested worldwide each day... that's nearly 24 acres of forest lost per minute.*
- *About 45,500 acres of land is lost each day to soil erosion... nearly 32 acres per minute.*
- *Each day, over 79,000 acres of land turns to desert... that's 55 acres per minute.*
- *Each year, over 19 tons of CO2 are emitted in the USA per person... over 105 pounds per day.*
- *Each and every second, nearly 400 pounds of toxic chemicals are released into the environment worldwide.*

So many people want to make a difference, but just don't know how. Learn how permaculture can make a real difference!

AMMA embracing the world

Learn how to design your garden, orchard or farm so that it is in harmony with nature. Practice sustainable living, protect the planet and increase your yields.

Permaculture creates systems that are ecologically sound and economically viable, providing for their own needs. They are sustainable; they do not exploit or pollute, and they are beyond organic. Discover the benefits of permaculture for yourself. Learn about this holistic, integrative way of connecting with our planet and develop a more conscious relationship with Mother Earth.

Learn permaculture concepts for the first two days and then apply them to a real working site during the second two days. Both novices and experts will benefit from these workshops.

Darren Doherty is internationally recognized as a leader and pioneer in permaculture and regenerative agriculture. A prolific and accomplished designer, Darren has completed more than 1,600 property development plans since 1993 in 47 countries. He has made his knowledge and experience accessible to over 12,000 students with 180 courses and seminars since 2001.
